My group's research emphasis is on both analytical chemistry and the study of cell-cell signaling. The major areas of analytical technology development involve small-volume peptidomics and metabolomics. Such measurements involve enhancements to capillary electrophoresis separation methods, laser-based detection methods, MALDI sampling techniques, nanoliter volume NMR and micro/nanofluidic sampling. The second group theme relates to cell-cell signaling. This includes neuroscience (the discovery of novel neurochemical pathways, new signaling molecules, their distribution, and function in a range of animal models) as well as quorum sensing and other aspects of cell-cell signaling in microbial communities.

Affiliations: Chan Zuckerberg Biohub Investigator; Department of Molecular & Integrative Physiology; Department of Bioengineering; Neuroscience Program; the Carle Illinois College of Medicine (CICOM); the Beckman Institute for Advanced Science and Technology (Intelligent Systems theme and the Neurotechnology for Memory and Cognition working group); the Cancer Center of Illinois (CCIL); the Carl R. Woese Institute for Genomic Biology (the Microbiome Metabolic Engineering theme); the Micro and Nanotechnology Laboratory; and the Roy J. Carver Biotechnology Center (CBC).

PROFESSIONAL EXPERIENCE
UNIVERSITY OF ILLINOIS URBANA—CHAMPAIGN

ACTING HEAD, DEPARTMENT OF CHEMISTRY

AUGUST 2023—AUGUST 2024

The Department of Chemistry at UIUC is one of the top rated chemistry departments in the USA. The head manages all aspects of the department, from faculty hiring, promotion and teaching to undergraduate curriculum and development. Major efforts during the year included extensive renovation and RAL expansion, faculty hiring and external departmental review. See <http://www.chemistry.illinois.edu/>.

DIRECTOR, SCHOOL OF CHEMICAL SCIENCES (SCS)

August 2012—November 2022

The School of Chemical Sciences consists of the Departments of Chemistry and Chemical and Biomolecular Engineering, and has a long tradition of excellence as one of the largest and highest ranked chemical research enterprises in the world. It has a combined annual budget in excess of 25 million dollars and has more than 200 employees. Duties of the Director include direct supervision and administration of the Departments of Chemistry and Chemical and Biomolecular Chemistry, reporting to the Dean of Liberal Arts and Sciences, and oversight of the school's space, safety, human resources, and its cluster of facilities. See <http://www.scs.illinois.edu/>.

DIRECTOR, ROY J. CARVER BIOTECHNOLOGY CENTER (CBC)

August 2002—August 2012

The CBC provides measurement services to the UIUC and outside communities in genomics, proteomics, metabolomics and a variety of other areas. Consisting of about 40 full-time staff, the CBC supports the research efforts of more than 280 research groups on the UIUC campus annually. Significant effort involved quadrupling the annual external funding; at the end of my tenure as director, the CBCs operating budget was >\$10M/year, of which 56% derived from service revenue, 24% from campus subsidy, and 20% from off-campus sponsored funding. In 2011/2, \$2M of new equipment was secured. As director, major duties also included strategic positioning of the center, the creation of new facilities, raising external funding, and a range of additional administrative duties. See: <http://www.iqb.illinois.edu/biotech/>.

DIRECTOR, UIUC NEUROPROTEOMICS & NEUROMETABOLOMICS CENTER ON CELL-CELL SIGNALING

August 2004—present

The UIUC Neuroproteomics & Neurometabolomics Center on Cell-Cell Signaling, a NIDA-funded P30 Center, both provides new proteomics and bioinformatics measurement capabilities to the UIUC and regional neuroscience community, and advances the performance of state-of-the-art proteomics technologies to new levels. The Center employs 10+ individuals working with multiple national and international research groups, and is involved in research, training and outreach activities. See: <http://neuroproteomics.scs.illinois.edu>
