Greetings	Professor Susan Martinis <i>Interim Associate Dean, College of Liberal Arts & Sciences</i>
Introduction	Professor Gregory S. Girolami
Speaker	Dr. Eugene P. Janulis <i>Technical Director, 3M Electrical Markets Division</i>
Presentation of Graduates	Professor Gregory S. Girolami Professor Benjamin J. McCall Professor Scott K. Silverman
Closing	Professor Gregory S. Girolami

Immediately following the ceremony, please join us for a reception in the breezeway between Noyes Laboratory and Chemistry Annex, on Mathews Avenue.

2014 Chemistry Convocation Speaker

Eugene P. Janulis, Ph.D.
Technical Director, 3M Electrical Markets Division

Dr. Eugene P. Janulis earned a B.S. degree in Chemistry from the Massachusetts Institute of Technology in 1979 and a Ph.D. in Organic Chemistry from the University of Illinois, Urbana-Champaign in 1983.

Gene joined 3M in their Corporate Research Technology Development Laboratory in St. Paul, MN in 1983 where he began new research into ferroelectric liquid crystals for flat panel televisions. In 1989, in addition to assuming the technical leadership for ferroelectric liquid crystals research, he assumed the technical lead for the development of new organic non-linear optical materials. In 1991 he moved into a technical manager position in 3M Corporate Research Science Research Laboratory role focusing on the development of new adhesive and materials technologies including B-stage interpenetrating polymer networks. In 1993 Gene moved to 3M Traffic Control Materials Division heading up reflective sheeting product development. His team introduced a number of revolutionary products including diamond Grade VIP retroreflective sheeting, fluorescent yellow-green retroreflective sheeting for school zones and fluorescent yellow retroreflective sheeting for warning signage. In 2000 Gene assumed his current position as Technical Director for 3M Electrical Markets Division in Austin, TX. In this role, Gene has been part of a team that has led a business transformation that has created significant new sales growth. Gene is responsible for Electrical Markets' global research and development; new product development and improvement; and technical service with laboratories in over 10 countries worldwide. Innovations from these laboratories include metal matrix composite core overhead conductors for electrical transmission; novel medium voltage "cold shrink" cable accessories; new high voltage cable accessories; sensed cable accessories for the "Smart Grid"; new electromagnetic shielding and absorbing materials; new insulation materials for motors, transformers and other original manufactured electrical equipment and new coatings for infrastructure corrosion protection. His personal research and development efforts have resulted in 15 issued U.S. patents where he is named inventor or co-inventor.
